Materials

In designing your lamp you will have to consider what type of material you will be using to make it.

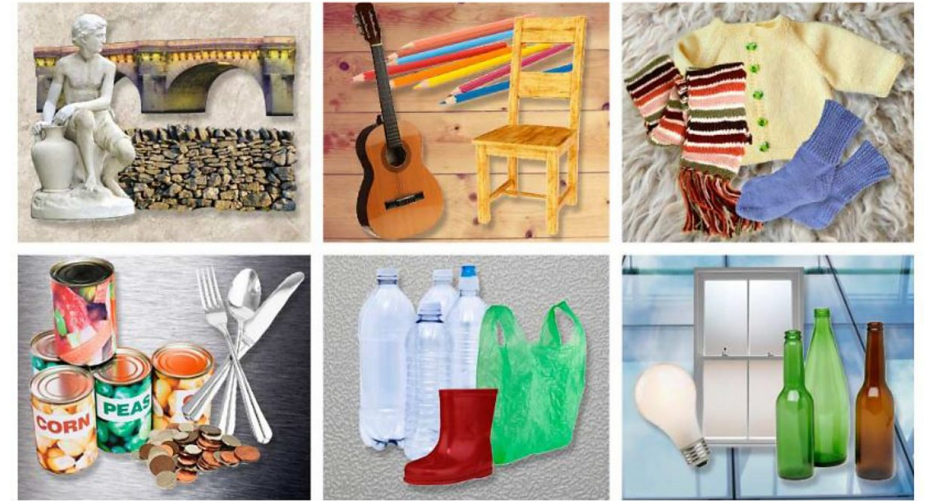

List different 5 types of materials you could use and consider the PROs and CONs. Don't forget to consider recycled materials.

Questions to consider:

What have you found in your research to inspire you? Are there any designers you can name who use this material.

Why do you think this would be a suitable material for your lamp?

How have you considered the environment? Will the material be easy or difficult to work with?

Ideation simply means 'the creation of Ideas'. Use the pages to 'ideate' some ideas for your lamp. If you are working on plain paper draw the boxes in quickly roughly 3cm by 4cm. The idea here is that you work quickly and come up with as many different ideas as you can. Try to keep a time limit for each sketch to no more than one minute. Don't worry about it being too neat at this stage. You should end up with a page of plenty of different rough initial ideas.

You can watch a video here if you have internet access. <https://www.youtube.com/watch?v=71vvkT2aaUQ>
