

# HOME LEARNING

## Year 9

### Reflection and Transformation

Essential learning:	<ul style="list-style-type: none"><li>• Completing symmetrical patterns</li></ul>
Practising:	<ul style="list-style-type: none"><li>• Reflect shapes on a coordinate grid (one quadrant)</li><li>• Reflect shapes on a coordinate grid (four quadrants)</li></ul>
Learning about:	<ul style="list-style-type: none"><li>• Draw lines such as <math>y = 3</math> or <math>x = -4</math> on a coordinate grid.</li><li>• Reflect shapes across horizontal or vertical lines such as <math>y = 3</math> or <math>x = -4</math></li></ul>
Extension:	<ul style="list-style-type: none"><li>• Reflect shapes across diagonal line: <math>y = x</math></li></ul>

### Contents:

- Worksheet 1** Symmetrical patterns
- Worksheet 2** Reflect shapes on a coordinate grid (one quadrant)
- Worksheet 3** Reflect shapes on a coordinate grid (four quadrants)
- Worksheet 4** Reflect shapes across horizontal or vertical lines such as  $y = 3$  or  $x = -4$
- Worksheet 5** Reflect shapes across diagonal line:  $y = x$

## BLOCK SYMMETRY SHEET 1

Complete the missing half of each of the shapes using the mirror lines.

Cut out each grid, and arrange them in different ways to make a larger picture with one mirror line going through it.

# Form a reflection of this shape and write down the new coordinates

Use the following to write the new coordinates

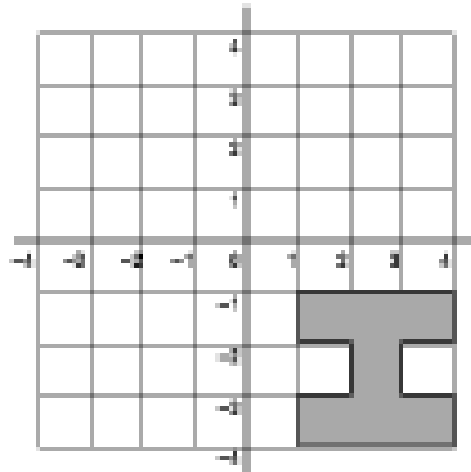

, ( )

**Worksheet 3** Reflect shapes on a coordinate grid (four quadrants)

Reflect the shape in the X and Y axis.

Remember the X axis goes across and the Y axis goes up.

**1. Reflect the following shapes in both mirror lines.**

**Worksheet 4** Reflect shapes across horizontal or vertical lines such as  $y=3$  or  $x=-4$

Place your mirror on the dotted line  $x=2$ , then draw the reflection.

On the second grid draw a vertical line through  $-1$  and then reflect the image.

**Reflection in named lines 1**

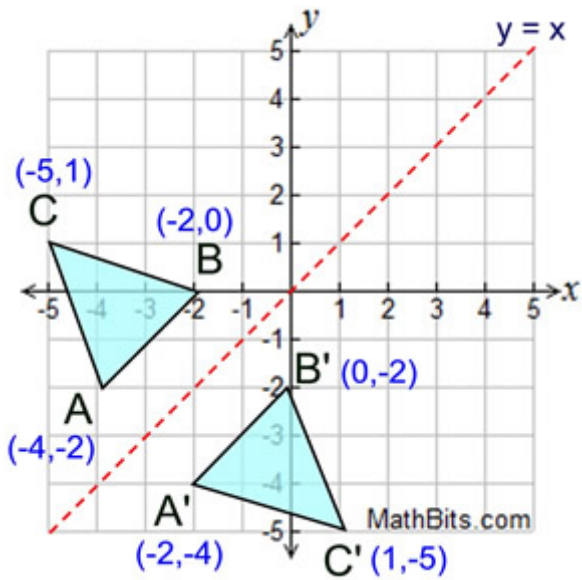

Reflect the shapes in the line  $x = 2$

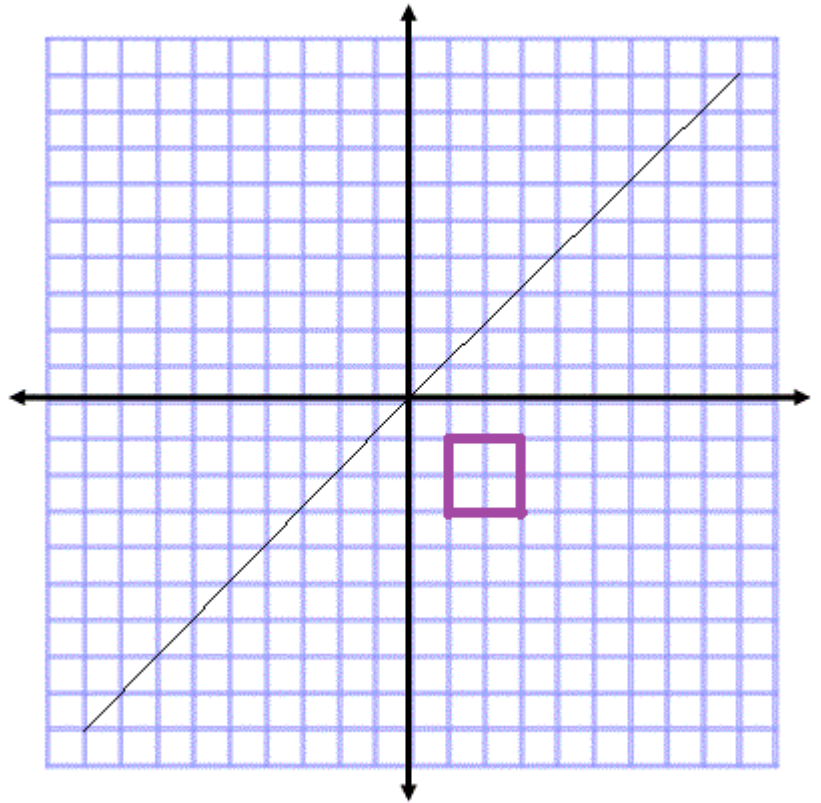

Draw the mirror line  $x = -1$   
Reflect the shapes in the line  $x = -1$

**Worksheet 5** Reflect shapes across diagonal line:  $y = x$

Shape ABC has been reflected in the line  $y=x$ . The reflection is shown as  $A'B'C'$

**Task 1:** Reflect the shape in the given line  $y=x$

**Task 2:** Draw the diagonal line  $y=x$  on the grid, then reflect the shape. Extension. Draw another shape onto the grid and reflect it.
